

ENVIRONMENTAL POLICY OF VIAR S.p.A.

Viar S.p.A. fully complies with environmental law and regulations in force: the ecomanagement system facilitates the accomplishment and allows to carry out preventive evaluations of environmental risks which may occur during the production process in the production area and with products.

Viar S.p.A. retains that the proper management of the company implies respect of the environmental needs.

To obtain this scope the top management introduces the environmental management system which involves all company levels in the achievement of the company objectives considering at the same time the environmental protection as a basic aspect of the proper activity.

Pointing to a continuous improvement Viar S.p.A. created its own ecomanagement system in order to keep under control all activities that may cause environmental risk, evaluate it and plan the management having as a target:

- Full compliance with law and regulations in force concerning the company and its activity;
- Reducing, recycling and reusing the waste;
- Preventing and reducing the possibility of environment risks;
- Avoiding the waste of resources and reducing the use;
- Handling any emergency

In order to achieve the above, the company has established clear and detailed procedures to guarantee:

- Constant monitoring of the environmental risk activities, need of training and informing staff;
- The choice of more environmental-friendly new processes and/or products;
- Continuous updating on new laws issued concerning the company's environmental system

Three ways to enforce the above scopes.

Internal Policy by:

- Assuring internal training and the involvement of all company levels;
- Defining and accomplishing environmental targets through drafting and carrying out programmes;
- Monitoring of the company's environmental aspects;
- Verifying the environmental management system efficiency

Policy concerning suppliers and sub-contractors by:

- Involving suppliers and sub-contractor in the achievement of the company's targets integrating as a responsible co-operator;
- Making them aware of the environmental problems and indicating certification of their own company as a total guarantee of the service and/or product;
- Including suppliers and sub-contractor in the controlled management of all environmental aspect, improving those for the benefit of the community.

Policy towards related parties and organization

- Spreading information concerning environmental problems and undertake steps to improve the company
- Allowing proper communication between the controlling organization and the company itself
- Maintaining lively contacts with the outside social-economical ambience

We intend to regularly check our production processes to minimize the environmental effects they might cause.

This can be obtained by choosing the latest technologies available.

Design, packing, use and handling of waste of Viar S.p.A. products have to at the same time comply with the criteria which minimize the impact of the products on the environment.

Any change or innovation of the product / working process will be subject to evaluation in order to apply if necessary, suitable preventive measures and to control or reduce effects on environment.

Moreover, in the choice of suppliers the preference will be given to those who adopt clean technologies and operate as per environment system management.

Viar S.p.A. trains and informs regularly its staff and workers in order to create an increasing attention towards the protection of environment.

The company is constantly seeking the cooperation of the local and public authorities.

ENVIRONMENTAL POLICY OF VIAR S.p.A.

The company is committed to employing proper human resources as well as financial resources to fully implement the above policy and reach the targets through necessary programmes.

By implementing ISO 14001 rules in the environmental system management the company is constantly seeking improvements as well as prevention of the pollution.

Furthermore, the environmental policy defining the situation of the company allows the top management of Viar S.p.A. to test periodically the company's objectives and scopes concerning environment.

The top management of Viar S.p.A. commits to inform about the herein environmental policy all the staff and worker (internal and external supplier of goods and services) who are involved in the environmental of the above formal document.

The top management of Viar S.p.A. guarantees full availability to public of environmental policy.

With the reference to the above, the top management of Viar S.p.A. appoints the environmental manager as the representative of the top management for the environmental system management.

The top manager will be responsible to furnish the necessary resources (human, technological and financial) to enable the environmental manager implement his tasks.

The environmental manager, once in charge and following the ISO14001 will have to:

- Formalize and keep updated the documentation of the environmental management system;
- Ensure that the operational and organisational documentation required by the law is fully complying with and applied in the system;
- Document and report to the top management the status of the company's environmental performances in order to review the system to guarantee continual improvement.

To fulfill all the above mentioned tasks and duties, the environmental manager has the authority to avail of internal or external competent cooperation which will be in charge of supervision and coordination.

The top management of Viar S.p.A.
